Our Process Breakdown

Analyze Your Network

- Conduct on-site visits at your facility to understand layout, organization, company mission and goals.
- Determine need for on-site PGT Services personnel as well as off-site resources for a single location or entire network.
- Evaluate overall logistics costs and delivery lead time needs – both in total as well as by lane or service type.
- Understand your information technology, shipment status and overall performance reporting needs.

Apply Logistics Expertise and Technology

- Simplify and improve your logistics operations by leveraging PGT Services technology and expertise.
- Review the existing carrier base and enhance it.
- Work to enhance service and cost with carrier management and optimization.
- Refine technologies to drive improvement to service and shipment status communication.

Provide Detailed Reporting and Ongoing Analysis

- Work with you to develop new services as your business evolves.
- Improve reliability and access to consistent capacity.
- Provide consolidated invoice in a format that works for you.

Optimize Capacity

- Flex capacity up and down quickly to meet your requirements.
- Provide solutions for the ever changing competitive transportation market.

Outcome: Expanded and Improved Quality of Service

- Utilize 40 years of transportation experience to exceed your expectations.
- Provide accurate data regarding status of shipments.

Our managed transportation services result in on-time delivery of your products. Take advantage of our 40 years of transportation history combined with our recent investments in technology.
