

PGT SERVICES

PIPE

PERFECTING THE BASICS: PIPE

We're industry leaders in transporting pipe commodities. Our specialized equipment and experienced team ensure secure and efficient deliveries, meeting all your pipe transportation needs.

PGT SERVICES BY THE NUMBERS

With expertise in hauling pipe, we have moved over 2,000+ pipe loads across the US over the last year.

OVERVIEW

At PGT Services, one of our specialties is pipe transportation. Our experienced team has access to specialized equipment ensure safe and efficient delivery of various pipe products for all needs such as construction, industrial use, or plumbing. We prioritize security and reliability, making us a dependable partner in the pipe industry, delivering pipes on time and in great condition, with transparency throughout the entire process

COMMODITIES

PGT Services transports Pipe commodities daily including PVC, structural, conduit, cast iron, Galvanized Steel pipe, tubing, and materials used for Oil & Gas projects.

PVC

We move PVC pipes into sites for construction, plumbing and drainage, irrigation water distribution and electrical installation projects!

Steel Pipe

Steel pipes play crucial roles across various sectors. In construction, they offer structural support for buildings and bridges, while in transportation, they enable fluid and gas transport.

Speciality, Drainage, Oil & Gas

We also can provide service for other pipe needs including: Speciality pipes customized for unique applications, drainage pipes managing stormwater and sewage, and oil & gas pipes facilitating drilling, transport, and distribution in the energy sector.

LET'S TALK STEEL!
