FLATBED COMMODITIES SHIPPED

When shipping flatbed, you need industry experts that understand the importance of safety, regulations, and securement. We have the years of experience needed to handle flatbed shipping in:

Steel

Headquartered just outside of the Steel City, we have perfected the securement of steel, including metal panels, coils, structural steel, rods, and many more!

Building Materials

Lumber, wallboard, flooring, roofing, shingles and siding are just a few of the building materials we move every day for constructing houses and more.

Drayage

With our experienced project logistics team, we have built relationships with trusted dray carriers, have access to key contacts and processes directly at the ports.

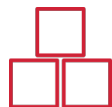

Heavy Machinery

One of our specialties is specialized and heavy haul. We move tractors, trailers, machinery parts, attachments, wheels and tires every day!

Pipe

Structural, conduit, PVC, cast iron, pipe tubing are a few of the commodities we move. Since day one we have moved an abundance of pipe.

Other

Whether it is something out of the ordinary or possibly oil, gas, military, retail, or food - we have the capability to handle any load we come across.
